

CONTENTS

Enhancing Bioreactor Functionality in Bio-Processing Courses

Givmanesh and Iyer

Facilitating Mathematical Modeling and Inquiry Through Population Growth and Falling Body Problems

Jaye and Burks

Virtual Students' Perceptions of E-Learning in Iran

Pezeshki Rad and Yaghoubi

Hands On Programmable Logic Controller (PLC) Laboratory for an Industrial Controls Course

Purdy, Barrett and Wright

Integrating Gallery Walks and Wikis in a Synergic Instructional Activity: An Exploratory Study of Students' Perceptions

Hogan and Cernusca

Creating and Implementing Cloud-Based Simulations to Enhance a Multivariable Calculus Course

Guarino, Chyung, Adams, DeLeon, Scheepers, Castellon, Wiedenfeld and Williams

Assessing Collaborative Undergraduate Student Wikis and SVN with Technology-Based Instrumentation: Relating Participation Patterns to Learning

Ganapathy, Shaw and Kim

Old Tricks for a New Dog: An Innovative Software Tool for Teaching Real-Time DSP on a New Hardware Platform

Morrow, Wright and Welch

Lecture Engagement: The Mobile Participation System – Not Just Another Clicker

Lapp, Ringenberg, Summers, Chivukula and Fleszar

Using the Excel Solver for Nonlinear Regression

Fox

Faculty Usage of Cloud Computing: The Capabilities and Risks

Schilling

Mobile Robotics Laboratory in a Virtual World

Avanzato

Web-Based Scripts for Animating System Simulations

Bielenberg and Cheever
