## **COMPUTERS IN EDUCATION JOURNAL**

## COMPUTERS IN EDUCATION DIVISION OF ASEE VOL. 7 NO. 4 OCTOBER – DECEMBER 2016 JOURNAL

## **CONTENTS**

Teaching Software Requirements Inspections to Software Engineering Students	
Through Practical Training and Reflection	,
by Goswami and Walia	4
Enhancement of a Finite Element Analysis Course for Structural Engineering	
by Navaee and Kang	11
Year Two: Analysis of 3D Technology Impact on STEM Based Courses;	
Specifically Introduction to Engineering Courses	
by Perez, Espinoza, Gomez, Pitcher, Anaya, Hemmitt and Nevarez	25
Content Independent Classroom Gamification	
by Cain, Anderson and Taylor	39
The State-of-the-Art Matrix Analysis for Usability of Learning Management Systems	
by Aydin, Darwish and Selvi	48
A New Robotics Educational System for Teaching Advanced Engineering	
Concepts to K-12 Students	
by Gonzalez and Zalewski	61
A Virtual Laboratory System with Biometric Authentication and Remote	
Proctoring Based on Facial Recognition	
by Zhang, Zhang, Chang, Esche and Chassapis	74
A Technical Elective Course in Modeling and Simulation – Teaching the	
Capabilities and Limitations of Professional-Level Software	
by Watkins	85
Exploring the Feasibility of an Educational Computer Game as Novel Means of	
Assessing Problem-Solving Competencies	
by Grohs, Maczka, Soledad and Bagalkotkar	95
Introducing High Performance Computing to Undergraduate Students	
by Cui, Wang, Li, Peng and Yalvac	104
